

DVH Analytics

Bokeh

Bokeh is a Python interactive visualization library that targets modern web browsers for presentation. Its goal is to provide elegant, concise construction of novel graphics in the style of D3.js, and to extend this capability with high-performance interactivity over very large or streaming datasets.

- Easy, free, works on Windows, Mac, Linux
- Very large library of add-ons
 - DICOM reader, SQL communicator, plotting

Python

- Interactive plotting package for Python
- Creates webpage and server for you
